PROFESSIONAL EXPERIENCE

FREELANCE SOFTWARE DEVELOPER, HUNT, GATHER <Austin, TX>

July 2021 - Present

Hunt, Gather is a female owned ad agency with clients such as Chipotle, Dell, and The City of Houston.

- Specializing in creating JavaScript workarounds to Webflow blindspots to meet accessibility requirements
- Using Webflow for responsive front-end design, AWS for deployment, backend software development through in-house created platform, "DK", soon to be opensource.

JUNIOR SOFTWARE DEVELOPER, TOTALLY NORMAL HUMANS <Nashville, TN>

March 2021 - July 2021

TNH was a consultancy start-up specializing in web applications for clients in healthcare. Position was fully remote and contract-based.

- Building modular, reusable components and libraries. Optimizing application performance while keeping an eye on recent JavaScript, React, and VueJs ecosystem changes
- Planning, building, and deploying new features on multiple projects using React.js, Vue.js, TypeScript, functional CSS3 with Sass, Firebase for user authentication and file storage, and API management with Contentful headless CMS
- Operating both independently and on small agile teams designing, developing, and refining in a fully-remote environment. Creating reports with quick turnaround to provide data for projects, presentations, and client meetings
- Ideating, connecting, and group brainstorming to better translate clients' business needs into functional code with expectations of high quality deliverables within tight timelines

APPRENTICE FRONT-END AND PYTHON DEVELOPER, NASHVILLE SOFTWARE SCHOOL

September 2020 - March 2021

NSS is an intensive 6 month, full-time boot camp conducted in a simulated company environment with Scrum methodology anchored in professional training utilizing group and individual project based learning.

- Single page application development with React, with a focus on ES6+ JavaScript features and modular code
- Server-side development with Python, Django, and SQL

DIRECTOR OF OPERATIONS / PARTNER, SIDESHOW SIGN CO. <Nashville, TN>

2012 – 2017

Sideshow Sign Co. is an award-winning Nashville-based design company focused on signage and dimensional branding. I started Sideshow in a friend's garage with my business partner in 2012. Five years later our client list included Nike, ESPN, Warby Parker, Panera, and Whole Foods corporate.

- Collaborating with design and fabrication departments and client businesses, large and small, to identify end-user requirements and specifications
- Troubleshooting and seeking client feedback in order to maintain and improve existing systems and policies
- Compiling, observing and assessing client feedback to improve company performance
- Project management, concept development for product lines, budgeting, sourcing rare/used materials for custom signage, overseeing all scheduling and operations related to custom sign fabrication for businesses.

Technologies used: Quickbooks, Notion, Squarespace, Microsoft Office

EDUCATION

Nashville Software School | Web Software Developer Certification (Oct 2020 - March 2021)

Middle Tennessee State University | B.A. in English | Summa Cumme laude
